3M Commercial Solutions

Welcome to the Revolution.

3M™ Envision™ Print Wrap Films
3M™ Envision™ Wrap Overlaminates

High-performance technology
with a sustainability edge.

NEW!

Now installs even easier: 3M™ Comply™ Adhesive with micro technology provides excellent air-release for smooth results.

3M™ Envision™ Wrap Films | **Welcome to the Revolution.**

Everything you love – and more.

When non-PVC film is this conformable and versatile, why use anything else?

Since 2012, you've embraced 3M Envision Wrap Films. With their breakthrough boost in attributes and greener approach, this non-PVC, high-performing film goes practically anywhere and can do practically anything. And now, installs are even easier: Comply™ Adhesive with micro technology provides excellent air-release for smooth results.

Meet the suite that's
100% printer compatible:

3M Envision Print Wrap Film SV480mC

- Designed for solvent/eco-solvent and UV printers
- Ultra versatile to wrap just about anything

3M Envision Print Wrap Film LX480mC

- Designed for latex and UV printers
- Ultra versatile to wrap just about anything

3M Envision Gloss Wrap Overlamine 8548G

- Provides exceptional gloss and clarity
- Allows squeegee to glide smoothly
- Resists squeegee scratches
- Use with Envision Print Wrap and cast vinyl print films

3M Envision Luster Wrap Overlamine 8549L

- The ONLY non-PVC luster wrap overlamine on the market
- Provides a soft sheen, minimizing glare
- Offers excellent durability, plus horizontal warranty
- Use with Envision Print Wrap and cast vinyl print films

Naturally Versatile.

Express lane: Install 50% faster
on textured surfaces.

Industry-Changing Performance.

These 3M innovations mean business.

Meet the non-PVC films that outperform the rest. 3M Envision Wrap Films include the 3M innovations you know and love: excellent print quality, slideability, snap-up (repositionability), heated film recovery and now non-visible air-release channels using micro technology for a smooth visual appearance, superior performance and even an easier, faster and better-looking installation.

Faster removals. The ability to wrap just about anything. And a greener solution.

We call these films a major breakthrough. You'll call them revolutionary.

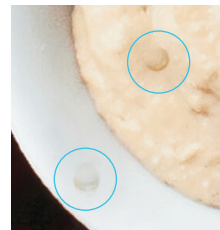

1 Highly conformable.

3M Envision Wrap Films are conformable on demand, and can be applied even in corrugations and deep recesses (3D-applications). Tackle the most challenging contours without cutaways or adding pieces of film. And better lifting resistance means no unnecessary and tedious rework.

2 Faster removal.

Unlike cast vinyl – which can be more brittle and prone to tearing – these films feature greater tensile strength, so they resist tearing for faster, cleaner removal. And because no primer is needed, removal is easier and residue-free.

Other film

Our film

3 Extremely durable.

Inherently more durable than vinyl, 3M Envision Wrap Films guard against UV rays, high temperatures, moisture and even acid dew – especially in horizontal and non-vertical applications. No browning. No staining. Plus, 3M warranties have you covered, even horizontally.

Unmatched versatility.

Horizontal. Vertical. Indoors and out. 3M Envision Wrap Films are versatile enough to wrap everything from vehicles and boats to fleet and buildings – one print wrap film can do it all.

4 Exceptional clarity.

3M Envision Gloss Wrap Overlaminates 8548G provides outstanding gloss and clarity, and better scratch resistance during installation. No more telling customers to wait for squeegee marks to disappear in the sun. It looks great from the get-go.

Easier and faster installs.

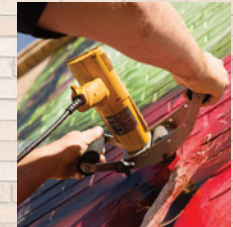

Our easier-to-handle graphic panels offer dimensional stability. They won't sag and are more manageable, plus the squeegee glides quicker and smoother. That means less wrinkling, less time – and less frustration.

Textured surface expert.

Continue to tap into unused real estate with more confidence and speed – **50% faster.*** Our films are designed to install on common moderate textures such as brick, stucco and cinder block.

*When compared to 3M™ Scotchcal™ Graphic Film for Textured Surfaces IJ8624 and 3M™ Scotchcal™ Luster Overlaminates 8524.

Luster finish.

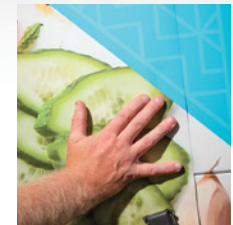

Meet the first and ONLY non-PVC luster wrap overlaminates on the market. Our new 3M Envision Luster Wrap Overlaminates 8549L offers all the same benefits as Gloss – including optimum performance, UV protection and durability – with a soft sheen that minimizes glare.

5 Install in extreme temps

Aligning trailer panels in 85° heat? No sweat. When it's warm, the films won't get too soft or stretch too easily – for an install that's **16% faster.*** In cool weather, they maintain a soft feel and won't tear. Just apply heat to conform on demand.

*Scientific study determined a 40-minute savings on trailer wraps vs. a competitive cast vinyl. See www.3m.eu/EnvisionWrap for details.

3M™ Envision™ Wrap Films | Welcome to the Revolution.

Shift your thinking.

Go greener without sacrificing good looks.

It can be difficult to change from materials and processes you know work well. With 3M Envision Wrap Films, you get even more performance — and they're greener.* All from a company you trust for exceptional quality.

3M™ Envision™ Wrap Films are:

- Non-PVC
- Phthalate-free
- Made in part with bio-based materials*
- Manufactured using 58% less solvent**
- Made without chlorine or other halogens added

Sustainability matters.

Having 3M Envision Wrap Films in your portfolio gives you the power to align your business with your customers' sustainability initiatives.

GREENGUARD Gold Certified.

3M Envision Wrap Films and Overlaminates have earned the prestigious GREENGUARD Gold Certification. You can offer a greener graphic solution that will contribute to healthier indoor air quality.

* Applicable to 3M Envision Wrap Films LX480mC, 8548G and 8549L.

** For more information on the environmental benefits of these materials, please visit [3M.com/Graphics/Sustainability](https://www.3m.com/Graphics/Sustainability).

Make Waves.

Choose your film. Choose your overlaminates.
It's that easy with the most versatile films
on earth – or water.
