

A powerful new weapon in the war on bubbles

AirMask®

AirMask is a film premask that is uniquely engineered for cold laminator application to exposed air-release liners

Vinyl layer and air-release liner

TransferRite AirMask adheres well to air-release liners, but won't lift vinyl off the target surface

Magnified, exploded view

AirMask®

Air-release liners have been helping to eliminate bubbles for years, but no premask has worked well - Until now! TransferRite AirMask is a unique film with an affinity for air-release liners.

- Effectively adheres to exposed air-release liners
- Works with a wide range of vinyl and liner brands
- Designed for cold lamination - no heat vacuum required
- Releases cleanly and easily upon installation
