

Metamark MD3-B Series

Intermediate Grade Digital Blockout Vinyl

Metamark MD3-B is an intermediate grade 5 year calendared self-adhesive vinyl for printers using Solvent, Eco-Solvent, UV and Latex inks. The product features a grey pigmented solvent-based adhesive to provide increased opacity and image brilliance.

MD3-B can be used for interior and exterior applications on flat or gently curved surfaces such as vehicle graphics, and the grey adhesive provides increased opacity to obscure the substrate. It is not suitable for application over rivets or complex curves.

Performance you can trust
